

2027

Student Cluster Competition

Build and run a real HPC cluster, then compete head-to-head with top university teams from around the world. Get hands-on with GPUs and high-speed interconnects — no prior cluster experience needed. Represent Aalto on the world stage in Hamburg.

What is the SCC?

The ISC Student Cluster Competition is the 16th edition of this global contest, run by ISC High Performance and the HPC-AI Advisory Council. Teams first compete virtually on real supercomputers, then top teams build and run a physical cluster onsite — June 8–10, 2027, in Hamburg. Team Aalto applications open August 1, 2026 and close November 20, 2026. Email scip@aalto.fi to join.
